OBJECTIVE

To build a challenging and rewarding career with a forward-thinking organization where I can continuously learn, grow, and contribute my skills toward achieving organizational goals.

TECHNICAL SKILLS

Programming Languages: Oracle PL/SQL, Unix Shell Scripting, Java

Databases: Oracle 19c

Cloud Platforms: AWS (Amazon Web Services)

Development Tools: TOAD, VSCode IDE, WinSCP

Version Control: Git, GitHub

Monitoring Scheduling Tools: Autosys, Dynatrace, Splunk

WORK EXPERIENCE

Associate

Cognizant Technology Solutions, India

Oct 2021 – Present

Project 1: The Hartford - Case Management Legacy

Oct 2021 – Present

- Analyzed and optimized Oracle PL/SQL procedures, packages, and forms in a legacy insurance application.
- Developed and updated stored procedures, triggers, and backend scripts to support business processes.
- Resolved critical production issues, performed RCA, and coordinated permanent fixes with dev teams.
- Collaborated with stakeholders to create functional specs and align solutions with business needs.
- Managed month-end data validations and reconciliations to ensure accurate financial reporting.
- Designed intake forms and led automation efforts to reduce manual tasks and improve efficiency.
- Attended client calls for status updates, requirement discussions, and solution recommendations.
- Guided junior team members on production support tasks, RCA writing, and Oracle workflows.
- Delivered enhancements and bug fixes in Oracle Forms and PL/SQL, improving overall stability.

Project 2: The Hartford Case Management 2.0

Oct 2024 – Present

- Supported a new Java–Angular web app replacing the legacy Oracle Forms system.
- Analyzed Java microservices and APIs to resolve functional and backend issues.
- Used Dynatrace and Splunk for log analysis, monitoring, and RCA in production.
- Coordinated with Java teams for fixes, patch deployments, and business validations.
- Upskilled in Java, Spring Boot, and microservices for backend support activities.
